We as truck drivers need this information that we get from the XM Radio. They keep us informed off the weather and back ups on the road around major cities. We can avoid getting caught up in the back ups if we have the information in advance. And we will be able to get to our destination sooner and on time. The weather is a big factor in our driving. And we need to be kept informed. Please do not stop this from being aired to us. We need and depend on this. Thank you and God Bless
